Bitki & Vitamin & Mineral Takviyeleri

Avicenna

Avicenna Assurance:

Advanced Technological Infrastructure: Avicenna products are developed in our laboratory operating in the fields of R&D and P&D.

The laboratory, established on an area of 600 m², has the necessary technical equipment such as HPLC, GC-MS, atomic absorption, etc. to perform all raw material and product analyses required during the process.

Avicenna Assurance:

Advanced Technological Infrastructure: Avicenna products are developed in our laboratory operating in the fields of R&D and P&D.

The laboratory, established on an area of 600 m², has the necessary technical equipment such as HPLC, GC-MS, atomic absorption, etc. to perform all raw material and product analyses required during the process.

Around 15-20,000 analyses are performed annually on average.

Expert Staff in the Field: The laboratory staff consists of doctors, chemistry, food, chemistry engineers, medical and aromatic plant experts. The laboratory team is quite experienced in natural products and medicine.

Successful projects are carried out with universities and various institutions such as TUBITAK, Istanbul University, Ege University, etc., which are the pioneers of science in Turkey.

GMP Certified Production Facility: Production is carried out in its own facilities in Turkey.

In the production area with GMP (Good Manufacturing Process) conditions, final products are prepared from quality raw materials selected from the best regions of Turkey and the world.

Quality-Focused Approach: Aflatoxin tag and microbiological tests are performed on the plants and plant extracts used.

The active ingredient amount of the plant extracts used is determined with HPLC. Impurity and composition measurements of components are performed in the oils.

There is more than one species of a plant. The amount and effectiveness of the active ingredient specific to the species may vary. For this reason, in order to determine the correct plant, the plants that we will use in our products are identified and used in the Pharmaceutical Botany Laboratory of Istanbul University Faculty of Pharmacy.

Verification tests are performed regularly on the final products in independent accredited laboratories.

Why Avicenna Products?

- Our company is the first in the Natural Products sector among R&D centers.
- The products are developed by an expert staff in the field.
- The R&D and P&D teams use raw materials that complement each other and increase each other's effects while working on formulations.
- Pharmaceutical quality raw materials are used in production.
- Halal certified herbal capsules and softgels of beef gelatin origin are used.
- It is produced in a GMP certified production facility.

-The production facility has one of the healthiest softgel production lines in Turkey.

Production without harming nature is taken into consideration at every stage of production. Recyclable amber colored glass bottles that will prevent the product from being affected by light are used.

It is sold only in pharmacies.

Vitamin B12	10 mcg	80
Vitamin D3	10 mcg	200

NRV: Nutritional Reference Value

Taking supplemental folic acid increases the folate level of the expectant mother. Low folate levels are a risk factor for neural tube defects in the development of the fetus.

The beneficial effect during pregnancy is achieved when 400 µg of folic acid is taken daily as a supplement for at least 1 month before and up to 3 months after pregnancy.

FQLİD PLUS Tablets

Product Information: Microcrystalline Cellulose (E460i), Zinc Sulphate Heptahydrate (Zinc: 10 mg; %BRD: 100), Lactose Monohydrate, Pyridoxine HCl (Vitamin B6: 10 mg; %BRD: 714), Magnesium Stearate (E470b), Silicon Dioxide (E 551), Thiamine HCl (Vitamin B1: 0.7474 mg; %BRD: 67.9), Calcium -L- methylfolate (Folic Acid: 400 µg; %BRD: 200), Potassium Iodide (Iodine: 150 µg; %BRD: 100), Methylcobalamin (Vitamin B12: 10 µg; %BRD: 400), Cholecalciferol (Vitamin D3: 10 µg;%BRD:200)

Usage: For adults over 11 years of age, 1 tablet should be taken once a day. It is recommended to use at least 3 months before pregnancy and the first 3 months afterwards.

TEG Approval Number: 005868-08.05.2019

Active Ingredients	Name Serving	*%NRV
Vitamin B6	10 mg	714
Calcium L-Methylfolate	400 mcg	200
Vitamin B12	10 mcg	400
Iodine	150 mcg	100
Zinc	10 mg	100
Vitamin B1	747.4 mcg	67.9
Vitamin D3	10 mcg	200

Zinc contributes to the normal function of the immune system.

Zinc contributes to the normal metabolism of vitamin A.

Vitamin B6 contributes to the normal metabolism of homocysteine.

Vitamin D contributes to the normal function of the immune system.

Vitamin D contributes to the maintenance of normal teeth.

Vitamin D contributes to the maintenance of normal muscle function.

Vitamin D contributes to the maintenance of normal bones.

Thiamine (vitamin B1) contributes to the normal function of the heart.

MAJIVİTEX Tablets

Product Information: Microcrystalline cellulose (E 460 (i)), lactose monohydrate, yarrow extract, chaste tree seed extract, magnesium salts of fatty acids (E470b), vitamin D3 (cholecalciferol).

Usage: Adults aged 11 years and over are advised to take 1 tablet once a day.

TEG Approval Number: 009884-25.01.2021

Ingredient Name	Serving	*%NRV
Yarrow extract	100 mg	
Chaste tree extract	50 mg	
Vitamin D3 (Cholecalciferol)	10 mcg	200

NRV: Nutritional Reference Value

Vitamin D contributes to the normal absorption/utilization of calcium and phosphorus.
Vitamin D contributes to normal blood calcium levels.
