ODF (Oral Dispersible Film) Technology

“Fast Absorption, Effective Support”

Open from the Corner

Place on Your Tongue

Allow It to Dissolve

ODF, or Oral Dispersible Film, is a thin and practical film format that dissolves within seconds when placed on the tongue, allowing active ingredients to be absorbed directly into the bloodstream. No water is needed; active ingredients are absorbed quickly without passing through the stomach and digestive tract. As a result, bioavailability is enhanced, onset of action is faster, and delays often seen with traditional capsules or tablets are minimized.

ODF and Its Role in Bioavailability

- Traditional tablets and capsules must dissolve in the stomach and intestines, which can lead to loss of active ingredients in some vitamins and supplements.
- With ODF, active ingredients are absorbed through the oral mucosa and enter the bloodstream directly, providing fast and effective support without going through digestion.
- This feature offers a major advantage, especially for support related to energy, focus, immunity, sleep, and overall well-being.

Key Advantages of ODF Technology

- **Fast absorption and effectiveness:** Active ingredients enter the bloodstream rapidly as the film dissolves, providing quick support.
- An ideal supplement format for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- **Practical and portable:** The thin film design is easy to carry in a bag or pocket and can be used anytime.

- **Hygienic and safe:** Single-use film format ensures maximum hygiene and ease of use.
- **Consistent, uniform dosing:** Each film delivers the same amount of active ingredients and a consistent effect, standardizing the user experience.
- **Ease of use:** Can be taken without water and used quickly regardless of age or setting.
- **Ingredient protection:** Due to its low water activity, substances sensitive to heat, light and oxidation are better protected.

- **Lower-dose advantage:** Thanks to mucosal absorption, a lower dose may be sufficient for the same effect, and unpleasant taste can be easily masked with flavors.

ODF Use in Food Supplements

- Fastlip is among the pioneering products offering a fast, practical, and effective support experience by using ODF technology for vitamins, minerals, and herbal ingredients.
- This technology provides a solution suited to the pace of modern life and makes daily supplementation more accessible and effective.

ODF combines fast absorption, high bioavailability, and ease of use in a single format. Powered by the advantages of ODF technology, Fastlip products not only provide quick and effective support, but also deliver comfort, hygiene, and confidence to the user.

Fastlip

Fastlip Energy

Focus And Energy, In One Film-Tablet

Fastlip Energy is an innovative formula containing caffeine, L-theanine, taurine, ginseng, and peppermint oil. Thanks to ODF (Oral Dispersible Film) technology, it dissolves on the tongue within seconds and the active ingredients are absorbed directly into the bloodstream. This helps minimize metabolic loss and delivers fast, effective support for energy and focus.

Advantages of ODF Technology:

- No water needed: The thin film format offers easy use in any setting.
- Ideal for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- Suitable for those who need an instant boost in energy and concentration during intense work or study periods.
- Protection of sensitive ingredients: Heat, light and oxidation-sensitive materials remain stable for longer.
- Mucosal absorption: A lower dose may be sufficient for the same effect, and unpleasant tastes can be easily masked with flavors.
- Fast and uniform absorption: Provides consistent effects and maximum bioavailability with each use.
- Portable and practical: Easy to carry in a bag, pocket, or at the office.

Key Benefits of Ingredients:

- Caffeine (5 mg): Increases mental alertness and supports energy and attention levels.
- L-Theanine (10 mg): Provides balanced, clear mental energy alongside caffeine and supports focus.
- Taurine (10 mg): Contributes to energy metabolism and provides support during fatigue or stress.
- Ginseng Extract (10 mg): Enhances physical and mental resilience and supports performance.
- Peppermint Oil (1 mg): Offers a refreshing, revitalizing effect and enhances the overall user experience.

Ingredients

Active Ingredients: Caffeine 5 mg,
L-Theanine 10 mg, Taurine 10 mg,
Ginseng Extract 10 mg, Peppermint Oil 1 mg
Other Ingredients: Hydroxypropyl methylcellulose,
glycerin, sucralose, menthol, instant coffee
Packaging: 30 ODF films

Fastlip

Fastlip Vitamin B12

Energy On Your Tongue, Power In Seconds

Fastlip B12 delivers vitamin B12 in the methylcobalamin form via ODF technology. It dissolves on the tongue within seconds and is absorbed directly into the bloodstream without the need for water. This helps increase bioavailability and provides fast effective support without metabolic loss of the vitamin.

Advantages of the ODF Film:

- Due to its low water activity, substances sensitive to heat, light and oxidation are better protected.
- Ideal for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- With mucosal absorption, a lower dose may be sufficient, and unpleasant taste can be masked with flavors.
- Fast absorption and homogeneous dosing make effects reliable and consistent.
- Thin, portable film design is easy to carry in a bag, pocket, or wallet.

Key Effects and Benefits of Vitamin B12 (Methylcobalamin):

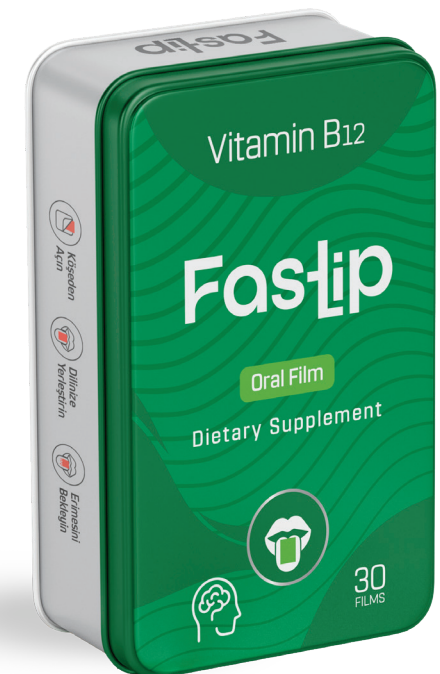

- Supports energy metabolism and contributes to the body's conversion of food into energy.
- Supports nervous system function and helps maintain healthy nerve cell activity.
- Contributes to red blood cell formation and helps reduce fatigue and weakness.
- Helps maintain cognitive function and supports concentration and mental performance.
- Contributes to homocysteine metabolism and supports cardiovascular health.

Ingredients

Active Ingredients: Methylcobalamin (B12) 1 mg

Other Ingredients: Hydroxypropyl methylcellulose, glycerin, water, sucralose, menthol

Packaging: 30 ODF films

Fastlip

Fastlip Melatonin

Your Key To The Night In One Film

Fastlip Melatonin is an innovative ODF (Oral Dispersible Film) formulation containing melatonin. It dissolves on the tongue within seconds, allowing the active ingredient to be absorbed directly into the bloodstream. This helps minimize metabolic loss and provides fast sleep support. It is an ideal solution for achieving a healthy sleep routine in cases such as a busy modern lifestyle, irregular sleep schedules, or jet lag.

Advantages of ODF Technology:

- Protection of sensitive ingredients: The low water activity film form ensures the stability of heat, light and oxidation-sensitive substances such as melatonin.
- Suitable for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- An ideal dosage form for adults seeking fast and practical sleep support.
- Mucosal absorption: The same effect may be achieved with lower doses, and the taste of melatonin can be easily masked with flavors.
- Fast and uniform absorption: Active ingredients are absorbed quickly, delivering consistent effects with every use.
- Portable and practical: The thin film design is easy to carry in a bag or pocket and allows convenient use in any setting.

Key Benefits of Melatonin:

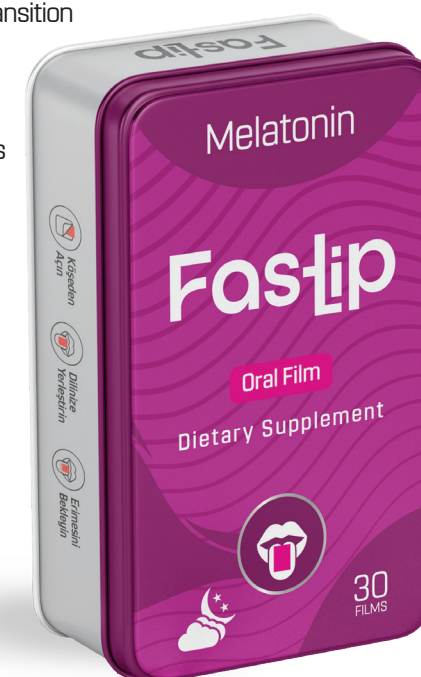

- Supports sleep onset: Helps regulate the body's biological rhythm and facilitates falling a sleep.
- Improves sleep quality: Contributes to supporting deep sleep and supports waking up feeling refreshed.
- Supports a regular circadian rhythm: Helps regulate the day-night cycle and may ease sleep issues related to jet lag or shift work.
- Relaxation and stress support: Helps the body transition smoothly into the night routine and supports relaxation after a long day.
- Combinable use: Provides effective support when combined with other sleep hygiene practices for users seeking fast sleep support in daily life.

Ingredients

Active Ingredients: Melatonin 3 mg

Other Ingredients: Hydroxypropyl methylcellulose, glycerin, water, sucralose, menthol, red beet extract, polyethylene glycol

Packaging: 30 ODF films

Fastlip

Fastlip Biotin

Three-In-One Daily Support

Fastlip Biotin - Folic Acid - Zinc combines three essential actives in a single ODF (Oral Dispersible Film) using advanced ODF technology. It dissolves on the tongue within seconds and is absorbed directly into the bloodstream without the need for water. This helps minimize metabolic loss and delivers fast, effective support. Designed for modern lifestyles, it offers a practical and portable daily care solution.

Advantages of the ODF Film:

- Protection of sensitive ingredients: The film form with low water activity ensures the protection of substances sensitive to heat, light and oxidation, such as B vitamins and minerals.
- Ideal for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- A suitable supplement format for anyone seeking support for hair, skin, and nail health.
- Mucosal absorption: Effective support may be achieved with lower doses, while unpleasant taste can be masked with flavors.
- Fast and uniform absorption: Active ingredients dissolve quickly on the tongue, ensuring consistent and reliable delivery with every film.
- Portable and convenient: The thin film design fits easily into a bag or pocket and can be used anytime, anywhere.

Key Benefits of Ingredients:

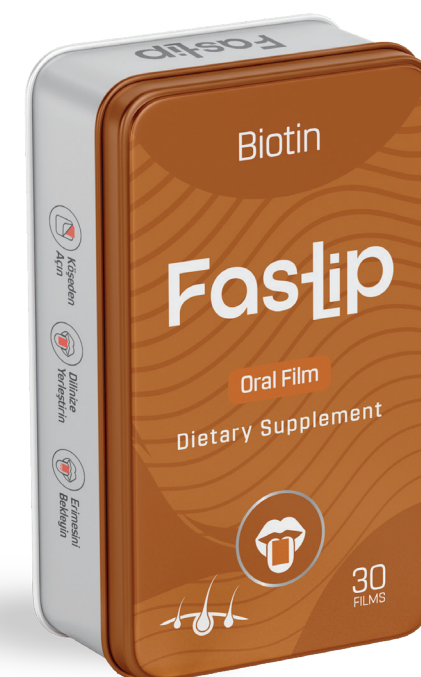

- Biotin (Vitamin B7 - 2.5 mg): Supports hair, skin, and nail health. Contributes to energy metabolism and overall vitality.
- Folic Acid (300 mcg): Contributes to cell renewal and normal blood formation, and supports immune function.
- Zinc (2.5 mg): Contributes to the normal function of the immune system, supports cell renewal, and helps maintain healthy hair, skin, and nails.

Ingredients

Active Ingredients: d-Biotin 2.5 mg, Folic Acid 300 mcg, Zinc Sulfate 2.5 mg

Other Ingredients: Hydroxypropyl methylcellulose, glycerin, water, sucralose, menthol

Packaging: 30 ODF films

Fastlip

Fastlip D₃ + K₂

Two-in-one daily support

Fastlip D₃ + K₂ delivers a combined formula of vitamin D₃ (cholecalciferol) and vitamin K₂ (MK-7) using ODF (Oral Dispersible Film) technology. It dissolves on the tongue within seconds and is absorbed directly into the bloodstream without the need for water. This helps improve bioavailability and provides fast, effective support. A practical solution for bone health, immune support, and calcium metabolism in modern life.

Advantages of the ODF Film:

- Protection of sensitive ingredients: The low water activity of the film helps protect vitamins D₃ and K₂ against heat, light, and oxidation.
- Ideal for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- Suitable for anyone seeking bone health and immune support.
- Mucosal absorption: Effective support may be achieved with lower doses; unpleasant taste can be masked thanks to natural flavors.
- Fast and uniform absorption: Active ingredients are absorbed quickly; each film provides consistent and reliable delivery.
- Portable and practical: The thin film design fits easily into a bag or pocket and allows quick, discreet use in any setting.

Key Benefits of Vitamins D₃ and K₂:

- Vitamin D₃ (Cholecalciferol - 1000 IU): Supports the immune system, increases calcium and phosphorus absorption, and helps maintain healthy bones and teeth. Contributes to the maintenance of normal muscle function.
- Vitamin K₂ (Menaquinone-7 / MK-7 - 25 mcg): Contributes to the maintenance of normal bones, helps direct calcium to where it is needed in the body, and works alongside vitamin D₃ to support optimal calcium metabolism.

Ingredients

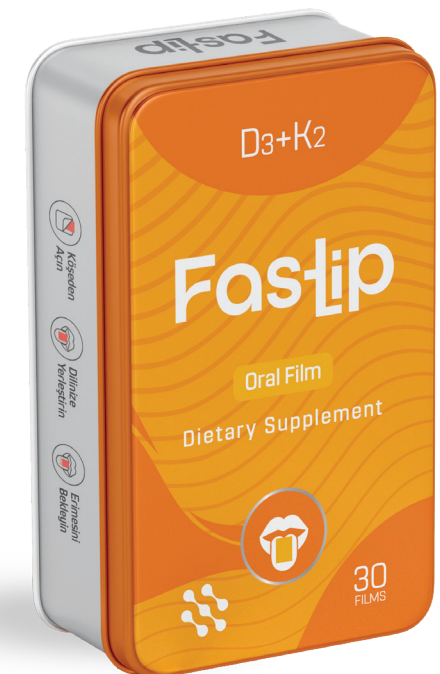

Active Ingredients: Vitamin D₃ 1000 IU,
Vitamin K₂ (MK-7) 25 mcg

Other Ingredients: Hydroxypropyl methylcellulose,
glycerin, water, sucralose, menthol, sunset yellow,
polyethylene glycol

Packaging: 30 ODF films

Fastlip

Fastlip RLX

Fast Film, Calm Mind

Fastlip RLX is an innovative ODF (Oral Dispersible Film) formulation containing saffron and lavender extracts. It dissolves on the tongue within seconds, allowing the active ingredient to be absorbed directly into the bloodstream. This helps promote mental relaxation and a sense of calm quickly, while minimizing metabolic loss and offering ease of use. It is an ideal solution for managing stress and fatigue in the fast pace of modern life.

Advantages of ODF Technology:

- Protection of sensitive ingredients: Thanks to the film's low water activity, saffron and lavender extracts remain stable against heat, light, and oxidation.
- Suitable for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- An ideal format for anyone looking for daily stress management and mental relaxation support.
- Mucosal absorption: The same effect may be achieved with lower doses, and taste can be masked thanks to natural flavors.
- Fast and uniform absorption: Active ingredients are absorbed quickly, providing consistent and reliable effects with every use.
- Portable and practical: The thin film design fits easily into a bag or pocket and allows quick, discreet use in any setting.

Key Benefits of Ingredients:

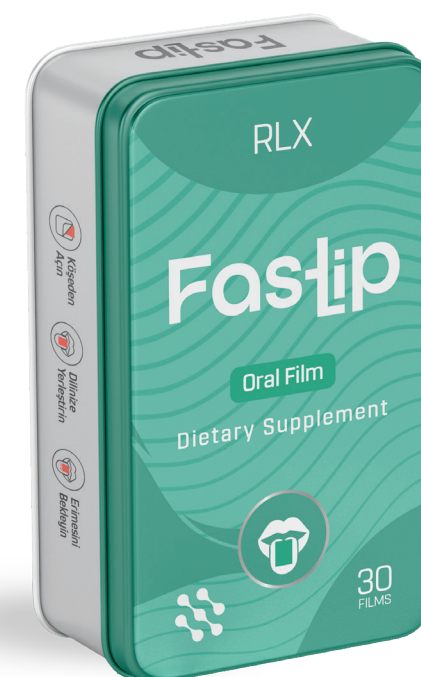

- Saffron Extract (10 mg, 2% Saffronol): Traditionally associated with mood balance and mental relaxation. Helps support stress and fatigue management and contributes to emotional well-being.
- Lavender (10 mg): Helps promote calmness and enhances relaxation and a sense of serenity through aromatic plant extracts. Supports mental ease at the end of the day or during intense periods.

Ingredients

Active Ingredients: Saffron extract 10 mg (2% Saffronol), Lavender 10 mg

Other Ingredients: Hydroxypropyl methylcellulose, glycerin, sucralose, menthol, lecithin, xanthan gum, beta carotene

Packaging: 30 ODF films

Fastlip

Fastlip Mouth

One Thin Film, Effective Support

Fastlip Mouth is an innovative ODF (Oral Dispersible Film) formulation containing propolis, sage, and olive leaf extracts. It dissolves on the tongue within seconds, allowing the active ingredient to be absorbed directly into the bloodstream. This provides fast, effective support for the mouth and throat area, helps minimize metabolic loss, and offers convenient use.

Advantages of ODF Technology:

- Protection of sensitive ingredients: Thanks to the film's low water activity, propolis, sage, and olive leaf extracts remain stable against heat, light, and oxidation.
- An ideal format for children, older adults, and individuals with dysphagia (difficulty swallowing) who cannot swallow tablets or capsules.
- Suitable for anyone looking for quick, practical daily support for mouth and throat care.
- Mucosal absorption: The same effect may be achieved with lower doses, and the taste of herbal ingredients can be easily masked with flavors.
- Fast and uniform absorption: Provides consistent effects and maximum bioavailability with each use.
- Portable and practical: The thin film design fits easily into a bag or pocket and allows quick, discreet use in any setting.

Key Benefits of Ingredients:

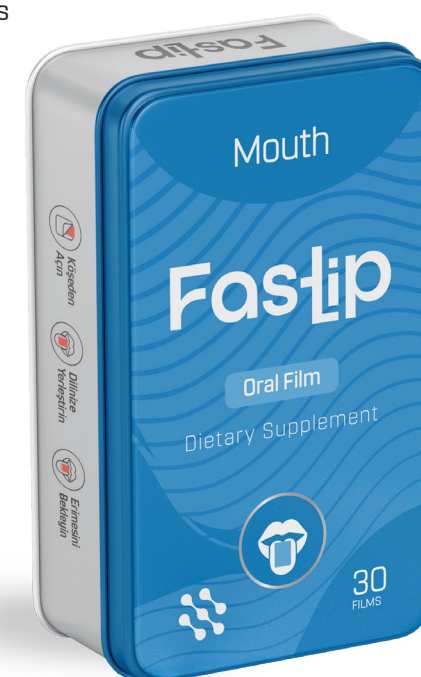

- Propolis: A natural resin produced by bees, traditionally used to support the immune system and throat health. Thanks to its antioxidant and natural protective properties, it supports the microflora in the mouth and provides throat comfort.
- Sage Leaf: Known for its antioxidant properties, sage provides a refreshing sensation in the mouth and throat area. A natural source of comfort for those seeking herbal support and contributes to oral hygiene.
- Olive Leaf: A plant-based extract that contributes to daily mouth and throat care. Thanks to its antioxidant effects, it protects the oral mucosa and contributes to general immune support.

Ingredients

Active Ingredients: Propolis 5 mg, Olive Leaf Extract 2mg, Sage Leaf Oil 0,2 mg, Clove Oil 1,3 mg, Mint Oil 1,3 mg

Other Ingredients: Hydroxypropyl methylcellulose, glycerin, sucralose, menthol, lecithin, pectin, starch, xanthan gum

Packaging: 30 ODF films
